Subject: Modified Region 9 statement

Dana, Christine and Reggie:

We have removed references to RSLs and instead compared our sampling results for the metals to MCLs for filtered water. Recall that further downstream, the Navajo Nation shut down its drinking water system at Montezuma Creek because of concerns about impacts from the spill. Of course, additional results for additional days and sampling stations downstream (including Montezuma Creek) will provide more assurances.

Please let us know if you have questions.

Good night!

Enrique Manzanilla

Director, Superfund Division

Region 9

Personal Phone/Ex. 6

Deliberative Process/Ex. 5

Chris Ruhl said not tonite? They we're suppose to remove any reference to risk based screening levels. We talked to Enrique about this a couple of times today. For water, are we are comparing to pre-incident levels.

Terry and Dana

This is the R9 data for 8/9/15. This has not yet been approved by HQ, but has been approved through the Regional EOC.

Below is the message to accompany this data:

Deliberative Process/Ex. 5

Deliberative Process/Ex. 5

Upon HQ approval, this is ready to post.

Thank you

Chris

FWIW, attached please find the 8/9 data spreadsheet I have been using.
In contrast to the 8/10-8/11 spreadsheet the columns are NOT marked
"preliminary" nor is there any other indication the data are prelim...

Please tell me this is not happening! After an entire day of work we are now saying that the 8/9 data is not validated. This is not acceptable. We need to get this out tonight. That was our commitment to the Navajo President. Please bring in Area Commander David Ostrander.

Christine Wagner here just informed us she does not have approval for the data from the 9th. She got the Region 6 approval for 9/10 mixed up with ours. Dana Tulis just told us they do not have anyone available for approval tonight. Dana says it has to be tomorrow.

We need to send the data for the 9th to Christine Wagner.

Thanks, I'll send now. But, previously we have not included EPA before risk-screening levels. I recommend remaining consistent.

Ok. That change made below. Ready to submit to HQs? Are we ok with release at 7:00 a.m. tomorrow rather than tonight, since it is 10:30 in DC?

Yes only 7,8 and 9 only. According to team this is the only "validated" data. Language looks. Would use "segment" rather than "leg". Also I would say that "additional testing" instead of "additional review".
